

How to manage your conditions and help the NHS

Oxfordshire
Clinical Commissioning Group

GP practices in Oxfordshire spent over **£3.3 million** on prescribing medicines for all these conditions in the last year. In some cases, treatments for these conditions could have been bought from a local pharmacy. It is cheaper for you than it is for the NHS.**

Look at www.nhs.uk for advice on how to stay well and reduce symptoms for minor conditions. Make sure you have enough of the medicine you need.

*All prices are based on a quick search of the cheapest available product in your pharmacy/supermarket (as at May 2017). **It costs more to the NHS than the purchase price from pharmacies and supermarkets because the NHS price is set nationally and additional fees are added to cover the process of checking and dispensing the prescription. There are also costs to the NHS associated with GP and nurse appointments and time spent by prescription clerks.

Spend data taken from ePACT March 2016 to Feb 2017. Equivalent number of staff estimated based on salary/net remuneration information from 'Unit Costs of Health and Social Care 2015' <http://www.pssru.ac.uk/project-pages/unit-costs/2015/index.php> (accessed May 2017)
